

DF1600 MAKE-UP AIR HEATER

By drawing 100% fresh air, Make-Up Air Heaters reduce air contaminants & pollutants while managing humidity levels and preventing condensation & mold growth. The thermostatically controlled air also prevents negative pressure that can lead to drafts and outside-air infiltration. The DF1600 is equipped with wide-scope gas modulation valving allowing for maximum temperature control and significant fuel savings. Like a permanent air handler, the DF1600 provides evenly distributed, warm, dry air.
